

# Learntron

Mobile Learning Platform

makes **tablet learning** accountable and effective

Research has shown that Tablet Learning is effective  
in improving learning outcomes.

However ensuring that Tablets are used effectively  
in classroom is a School's biggest challenge.

**Learntron platform makes Tablet learning in classroom  
effective and accountable by providing engaging features  
that makes learning fun and collaborative.**

### Flip classroom

using novel *Lesson Planning* tool that assists Teachers to structure study material into pre-class, in-class and post-class activities

### Blend Content

with *Embed functionality* to share content with students from teacher's local system, web-cam or online resources like Khan Academy, YouTube overlaid with teacher & student annotations

### Enhance student engagement

through *Manage Student tool* that helps Teacher to track student Tablet screen real-time, provide feedback and share the best work with other students

### Personalized Digital book

created automatically for every student using *Study board Canvas* that includes teacher content and annotations along with student annotations

### Accountable tablet usage

with *Access Management tool* that ensures Students use tablet in classroom only for learning and not playing games

### Track tablet effectiveness

using *Analytics dashboard* with detailed analysis on attendance, grade-book, student performance etc

### Track learning outcomes

using *Comprehensive Assessment suite* - quiz, assignment, group-work, etc

### Recorded class

using *Audio Video Recording* tool for giving access to absent students or for re-living the classroom experience at home

**Learntron is device and language-agnostic and can be deployed in cost effective manner either on cloud or in-premise architecture supported by comprehensive teacher training on tablet-learning pedagogies**
